

# Hassan Halawani

## Information Technology

I recently graduated from the University of Jeddah with a degree in information technology. I'd like to use the qualifications and talents I gained during my academic study. I have some website development expertise. In addition, I am eager to collaborate with others. I have worked with programming languages such as java, html/CSS, and PHP. I enjoy learning on my own. I am constantly eager to learn new things and take on new challenges.

**Information Technology**  
University of Jeddah  
GPA : 3.73

## Skills

- HTML\CSS
- Javascript
- PHP
- VS Code
- WordPress
- Self-learning
- Problem-Solving

## Language

Arabic

English

## Experience

### 2022 - June

Eradah (al amal) Mental Health Hospital

### Web Developer Internship trainee (Front End)

I worked in the hospital IT department for eight weeks.

I was assigned the following tasks:

- I worked on improving and designing the interface of the hospital's website
- I worked on creating a control panel for adding content
- I analyzed the website interface and troubleshooting design
- I had many meetings with specialists in the field

I have some technical support experience and would like to present what I have to your company

### Interest
